

Congratulations! You are about to learn what many are calling *the best kept secret in the wireless industry*. I have to warn you, this information could potentially change your financial future forever.

Let me ask you: Do you have a cell phone? Does your wireless provider allow you a way to get your service for **FREE? Would you like it if they did? Would you also like it if they allowed you to get paid to teach other people how to get their service for **FREE** as well?**

We're part of powerful new wireless company that has taken a unique approach to building a wireless customer base. We allow people just like you to earn **FREE** wireless service and if you are interested, we're going to also show you how to build an income by helping others do that too!

First, let's focus on **FREE** Service! **There are two ways you can STOP paying a cell phone bill TODAY!** One, become a customer with Lightyear Wireless and help 5 people do the same. By referring 5 customers to Lightyear, your bill is **FREE** forever as long as you and they remain on the same plan with Lightyear! Lightyear offers UNLIMITED TALK, UNLIMITED TEXT and

UNLIMITED WEB for ONLY \$59.99 per month on our Nationwide 3G/4G Network! That's up to 50% savings over AT&T and Verizon and if you refer 5 customers, your bill is **FREE!** That means you can save at least 50% by doing nothing other than switching to Lightyear, or you can save 100% by helping a few friends do the same. It's up to you! **4G is also available for only \$10.00 per month more. Now, let's explain how you can SAVE MONEY and MAKE MONEY with Lightyear!** Join Lightyear Wireless as a representative and help 3 people become customers. Representatives who refer 3 customers to Lightyear will receive **FREE** service forever as long as they and their customers remain with Lightyear.

Some people would argue that this is the most common sense wireless company and home business they've ever found! Think about how simple it is: We don't have to convince people that they need our product. We don't have to change the way they use it or teach them how to use it. And most importantly, we don't have to hope they keep buying more of it each month - because it's something they're going to do anyway. All we're doing is showing them how to get their service for **FREE** and how to create an income in their own business helping others do the same!

I know it sounds too good to be true. But it is true. Many people from all over the country have started their own wireless business with our company and they're already earning free wireless service and earning amazing incomes. The excitement about this incredible opportunity is sweeping the nation and we'd love to share it with you!

Remember, you're going to use your cell phone for the rest of your life, and so is everyone you know and everyone you don't know. If you're going to do it anyway, perhaps you'd like to learn about a way to profit from it. Perhaps you'd like to learn about a way to at least get it for **FREE each month.**

This truly is the best kept secret that could be the opportunity you've been waiting for. Get back TODAY with the person whose name is shown on this flyer and find out how you can start saving money! If you are interested in earning additional income, ask about our home business opportunity too.

We are on a mission to help people SAVE money on wireless bills and look forward to helping you soon!
